

City Lights

Bob Mould

Days go by
I need to see the city lights
Preview sky
I've got to make the most of this
I've been blind to your mistakes
In my distant memory
Hateful I should go
Caught me coming everyday

Take the wheel
There's got to be an exit somewhere
The less I feel
The more I like the way you treat me

Always want to reprimand
Whispering into my eyes
Too illogical
I need calm in everything

I want you near me but I need the space for contemplation
I want you dearly but I need to find the city lights
Going away from you, someday I'll be back to find you
I hope you understand, I need to find the city lights

I want you near me but I need the space for contemplation
I want you dearly but I need to find the city lights
Going away from you, someday I'll be back to find you
I hope you understand, I need to find the city lights

Days go by
I need to see the city lights
Preview sky
I've got to make the most of this
Days go by
I need to see the city lights
Days go by
I need to see the city lights
