

Keep Believing

Bob Mould

And now the hearts are beating
And all our sadness has been washed away
The drug that keeps me breathing
I stick it in me every day

The needle / The sound
This groove it goes around

An anthem keeps repeating
I'm dialing up a song from far away
And you can't get this feeling anywhere but
Here, right here, right now

No choice / Can't leave
I have to keep believing

Bring me thoughts and words, pass me the revolver
I can see for miles, and everything's in colour
Rock and roll all night, until I feel the thunder
I got a handle on some complicated fun

We're all sniffing glue, pleasures so unknown
A circle drawn in blue, the murmur baritone
Picnic on a Pedro lawn, heaven took that monkey song
Never mind the battle won, could you be the loveless one?

Always keep believing
Have to keep believing
Never lose that feeling
Have to keep believing
