

# Black White And Blood Red

BoDeans

Since history the pages turn  
We watched as all the fired burned  
A little hate in each of us  
Whoever said, "In God we trust"

Black, white, and blood red  
Black, white, and blood red

Down beaten paths through broken homes  
Where every man must stand alone  
To win his bread to feed the flame  
"I have a dream" has gone insane

Liberty, the right to die  
When did we ever cross that line  
That brought us here to this place  
Delivered by the human race
