

Make It Up

Bodyjar

Taken all my chances
Wondering if your still around
There are no excuses
There is no use talking about

You go through life you make it up
you know what's waiting for you
Its all your mind just make it up
you know whats waiting

You're strong enough to know the truth about it anyway
And I wont wait this time

Taken all my chances
Wondering wont help me decide
There are no excuses
There is no point feeling denied

You go through life you make it up
you know what's waiting for you
Its all your mind just make it up
you know whats waiting

You're strong enough to know the truth about it anyway
And I wont wait this time
