

## Out Of The Cold

**Bombshell Rocks**

I still have that feeling  
I always thought it would disappear  
But just like a faithful dog  
It followed me throughout the years  
I've got a place  
I've got a place where I can crawl and hide  
I've got a girl  
And my girl, she's always right by my side

Life's so easy when you've got a place to go  
And I thought I had  
Now I don't know  
No I don't know  
I just don't know  
If I've got a place to go

What about everything we did?  
Everything we did was it just a game?  
Can't take this pride  
Can't take this pride and replace it with shame

It's just that sometimes I feel lost  
I feel so alone, I feel so incomplete  
I feel like breaking out  
Out of the cold into the heat  
What if what's bitter could be sweet
