

# Come Back

Bon Jovi

Now that you're gone, I can see what  
Was going on and how you lied  
When you'd said you'd never love again

Friends telephone and they say  
You weren't out alone last night  
Can't you see that this broken heart  
Is killing me

Another night is falling  
And now my heart is calling you back to me

Come back cause I need your love  
Come back got to have your love  
Come back bring your loving back to me  
Come back cause it's been so long  
Come back, and my love's still strong  
Come back bring your loving back to me

You play with words play with love  
It's just your silly way  
I'm a fool cause I need you by my side again

Now it's too late you walk by  
With another man  
And I stand alone  
Cause I know that you're not coming home

Another night is falling  
And now my heart is calling you back to me

Come back cause I need your love  
Come back got to have your love  
Come back bring your loving back to me  
Come back cause it's been so long  
Come back, and my love's still strong  
Come back bring your loving back to me

Another night is falling  
And now my heart is calling you back to me

Come back cause I need your love  
Come back got to have your love  
Come back bring your loving back to me  
Come back cause it's been so long  
Come back, and my love's still strong  
Come back bring your loving back to me
