## Fear

I see you looking over your shoulder Tell me who do you think's out there You're reaching for your four leaf clover But baby there ain't no luck down there I swear that there's no heart in this city It's here the slogan reads "Do your time" everybody's doing Their sentence It's just there ain't nobody here Who knows just what's the crime I watched my father live a lie here I'd rather die than fade away I read the rules And yeah I know them Still you ain't ever gonna Make me play the game of Fear Fear Fear Fear

Running with the rats Through the city Makes you feel like you're A partner in crime Girl once you won't stop to watch That little girl did

Hey baby won't you stop and hear me Just being here we're Breathing heart attacks We can run and chase The setting sun we can run And we won't ever look back

Take my hand I know we'll make it I'll let nothing slow us down I know you want to curse This place but there's only One thing that's stopping us now

Fear fear fear Of a new thing Fear fear fear Of the brass ring

You ain't one for taking chances You work and live and breathe that 9 to 5 Still that's what you call living That's surviving to me

And surviving is living to die in Fear
