

Standing

Bon Jovi

I thought miracles were make believe
It's hard to hold what you can't see
I find the faith I need
Every morning when you wake up next to me
If all the shit we take for granted
Took our train and left us stranded
Let's make a stand and wave goodbye
Each night I see the world through brand new eyes
In my heart I hear the music playing
Can you hear it?
Take my hand
We can dance
To the laughter, to the tears
We can dance
To all those wasted years that disappeared
Hey, they got us here
Take my hand
We can dance
For the good fight and the bad
For the dreams that we still have
Looking back on it all, baby
We're still standing here
Take my hand
We can dance
Baby, lay down next to me
I want to feel each breath you breathe
In your kiss I taste the truth
I wanna get all tangled up in you
In your heart I hear the music playing
I can hear it
Take my hand
We can dance
With the laughter, with the tears
We can dance
With all those wasted years that disappeared
Hell, they got us here
Take my hand
We can dance
With the good fight and the bad
With the dreams that we still have
Looking back on it all, baby
We're still standing here
Take my hand
We can dance
And when the song is over
We'll still be going on.
Chorus
