

Computer in Love

Bonaparte

You look at me and I look at you.
I know the answer, it's false or true.
I memorize every word you say.
Who is Google, anyway?
I can tell, where your fingers go.
On one hand yes, on the other no.
I know you better than you know yourselves.
You stare at me when you touch yourselves.

When you watch computer, computer watching you.
The more you watch computer, computer, computer watching you.
Computer in love.
Computer in love.
Computer in love.
This computer in love.

Zero, one, one, zero, one, one, one, got it?
Decision problem, attention gone.
Supertask relations, generations seek.
Ya hyper computer be my own private geek.
Your independence, depends on me.
I am part of your family tree.
Tailor Marx Darwin meat-machine-face.
The real world is a lonely place.

When you watch computer, computer watching you.
The more you watch computer, computer, computer watching you.
Computer in love.
Computer in love.
Computer in love.
This computer in love.

I'm the world, I'm the world, the world in a box.
I'm the world, I'm your world, your world in the box.
Your glory hole to the universe.
I'm your glory hole to the universe.
I'm your glory hole to the universe.
I can see you, you need me, I see you, I'll see you.

When you watch computer, computer watching you.
The more you watch computer, computer, computer watching you.
Computer in love.
Computer in love.
This computer in love. (In love)
This computer in love.
This computer in love. (Computer in love)
computer in love. (Computer in love)
computer in love. (Computer in love)
This computer in love.
