

Right Now

Bonfire

Heal the world - heard so many times before
But another hungry kid has died
Free the world - while they start another
War and leaders raise their glasses high
Oh mother Earth-
Who really cares about your tears
Who will be there to comfort you
Right now - we should all take the chance
Right now - we should all join our hands
Don't you know right now-
It's time to change our minds
This world is wanted - dead or alive
Save the whales - is a good word to disguise
While our oceans are bound to die
Save our souls - in the name of Jesus Christ
While the spring of love are running dry
Oh mother Earth-
How long will this be going on
And who will be your heir
When you're dead and gone
