

Cryin' a Little

Bonnie Tyler

1. As the warm sun kissed the springtime
And the clouds drifted away
You'd walk along a sandy beach
Another endless day

As the summer turned to autumn
Nights were drawing in so near
Evenings laying by the fire
Love was truly here

R: And now you're cryin' a little
What happened girl - What happened girl
Did they destroy your perfect world
And now you're cryin' a little
What happened girl - What happened girl
Did they destroy your perfect world

2. As the fall changed into winter
It took her breath away
Nights were long and bitter cold
She saw the light of day

With the end of all four seasons
Oh things have moved so fast
A romance that was her's forever
Has melted with the past

R: And now you're cryin' a little...

The love that you crave for
Won't come so easily, no
All seasons change
And so do we

R: And now you're cryin' a little...
