## **Make It Right Tonight**

## **Bonnie Tyler**

It's gonna take time for us to trust again
I can see it in your eyes
All these walls you've been building around yourself
To keep the hurt away
Keep the tenderness inside

We've gotta find doors Gotta find an open road to your heart Came on baby...

You gotta be strong
Life is what you make it
I'm hanging on
Love's right here, just take it
Whatever is wrong
It won't take it long to make it right
We can make it right tonight

We've got to find words to heal these differences Gotta find some peace of mind There'll come a day you'll realise that After all, we're only human No-one's perfect all the time

But you've gotta hold on tight as hell to your dream It's never too late baby

You gotta be strong
Life is what you make it
I'm hanging on
Love's right here, just take it
Whatever is wrong
It won't take it long to make it right
We can make it right tonight

Twenty twenty vision

Looking back at our mistakes

But when it comes to now you can't see straight

Make this decision Heaven's here for us to take And heaven won't wait

Make this decision Heaven's here for us to take And heaven won't wait
