Open Your Eyes

Bonnie Tyler

We're gonna make our promises tomorrow

To forgive and forget the past

There have been some rocky roads to follow

But we made it back to love at last

Have you seen where we are coming from

Can you see the path that we can take

Let the feeling that you are falling take you away

R: You've got to open up your eyes
That's when you realise
Don't ask why let love take you away

We can say goodbye to pain and sorrow
Where gonna leave it in the past
The love we have strong and it's getting stronger
A love that was really made to last

You have been to where we're coming from Can you see the path we could take Let the feeling that you are falling take you away

R: You've got to open up your eyes... (2x)

Have you been to where we are coming from Can you see your future today? Let the feeling that you are falling take you away

R: You've got to open up your eyes... (3x)
