

Suicide Nations

Born from Pain

Cross the line
Feel the weight
All around us now
Growing harder, cutting deeper
Future's heading southbound

See this pain
In a world without mercy
Slipped away, lost the track
Only hurt here

Suicide
Suicide nations
Suicide

New horizons
Colder days
All there is is now
Life and death go hand in hand
Suicide's the new god

We've grown hard, we don't care
Like a plague that razes through humanity
We shed no love, we shed no light
We love the end, this is suicide
