

## Suicide Nations

Born from Pain

Cross the line  
Feel the weight  
All around us now  
Growing harder, cutting deeper  
Future's heading southbound

See this pain  
In a world without mercy  
Slipped away, lost the track  
Only hurt here

Suicide  
Suicide nations  
Suicide

New horizons  
Colder days  
All there is is now  
Life and death go hand in hand  
Suicide's the new god

We've grown hard, we don't care  
Like a plague that razes through humanity  
We shed no love, we shed no light  
We love the end, this is suicide
