

Glorious Day

Born of Osiris

Now we're living in this phase of self reflection
Moments
Changes we've embraced to find our way

The steps we've taken to feel this glorious day
We will never forget where we all came from
The reign remains
Truth stays and saves us it calls for you
This glorious day
We will never forget where we all came from
The reign remains

Starting ending madness a face untitled
Heartless ones around us with blank expressions
Wasted, tasteless, faceless
You're so contradictory

If this is where you feel safe
I can't help you any longer

The steps we've taken to feel this glorious day
We will never forget where we all came from
The reign remains
