

## Thank God For Worker Bees

Botch

Listen to what I have to say to you  
Painful repetition - comes and goes again  
Painful repetition - comes and goes again  
And it goes  
So now I'm the human  
Now I'm the human shield  
Finest engineering - we've ever seen  
Finite engineering - it never leaves  
Never leaves  
And that's why  
We dine on your design  
I like the look on your face  
It's bittersweet, and lasts  
For six hours  
Alone for one day and six hours
