

I found your Poison T-shirt  
look what the cat dragged in  
Seems like it was yesterday  
I remember when  
We said the word forever  
But that's all over now

We used to be the envy  
We used to be the talk of  
We used to be the best thing about this fucking town  
We used to be the ones who everyone thought would make it  
We used to be the best thing about this fucking town  
Whenever I'm sober I say to myself  
It sucks that it's over but at least we gave it hell

Our friends always gave us shit  
For being so in love  
King and queen of the PDA  
We kissed until the sun came up  
And you were gone  
We never said goodbye

We used to be the envy  
We used to be the talk of  
We used to be the best thing about this fucking town  
We used to be the ones who everyone thought would make it  
We used to be the best thing about this fucking town  
Whenever I'm sober I say to myself  
It sucks that it's over but at least we gave it hell

Time keeps moving on  
Our chances are all gone  
To follow through with all we said we'd do  
So I sing the eulogy  
To the ghost of you and me  
And drink another beer

The sun went down and you were gone  
We never said goodbye

We used to be the envy  
We used to be the talk of  
We used to be the best thing about this fucking town  
We used to be the ones who everyone thought would make it  
We used to be the best thing about this fucking town

When I'm not sober I say to myself  
Maybe I should call her, and wish her the best  
But I remember it's over  
And this feels like fucking hell
