

Winter Song

Boyz II Men

The dusk is gaining ground, lights flicker all around,
And as I walk the lonely streets,
The snow is fallin' ever faster,
Looking to the sky,
I wonder where you are,
The way you came in to my life,
I'm filling every day with laughter
Almost blinded by the snow flags on my face,
Despite the chill I feel the warmth of your embrace,
Intoxicated now I spanker like a fool
I feel that surely like a flow away.

I want to show you everything,
I see the way I'm feeling,
I need to be with you tonight,
To hold your arms around me,
My love for you is deep within,
The deepest snows of winter,
The greatest gift I've ever had was you, you.

You're sparkling crystal the world,
This magic winter land,
If I could share it all with you,
And make believe forever after,
Like a blanket over everything in shine,
And in the hush I hear this overnight,
The snow has covered all the streets we walk alone,
(I'm dreaming all alone)
And I hope you still remember me tonight,
I want to show you everything,
And I need to be with you tonight,
Hold your arms around me, huu
This snow of winter the greatest gift I ever had,
Carry in my feeling this way before,
Do you know, do you understand what's going through my heart,
The way that I love you I just hope you feel it too,
Tonight wherever you are.

I want to show you everything,
I see the way I'm feeling,
I need to be with you tonight,
To hold your arms around me,
My love for you is deep within,
The deepest snow on winter
The greatest gift I've ever had was you, you.

The greatest gift I've ever had was you, you,
The greatest gift I've ever had was you, you,
The greatest gift I've ever had was you, you.
