## **All That I Need**

 I was lost and alone Trying to grow Making my way down that long winding road Had no reason or rhyme Like a song out of time And there you were standing in front of my eyes

How could I be such a fool? To let go of love And break all the rules Girl, when you walked out that door Left a hole in my heart And now I know for sure

- R: You're the air that I breathe Girl, you're all that I need And I wanna thank you lady You're the words that I read You're the light that I see And your love is all that I need
- 2. I was searching the vain Playing a game Had no one else but myself left to blame You came into my world No diamonds, no pearls Could ever replace what you gave to me girl

Just like a castle of sand Girl, I almost let love slip right out of my hands And just like a flower needs rain I will stand by your side Through the joy and the pain

R: You're the air that I breathe...
