

Two Feet of Topsoil

Brad Paisley

Yesterday I thought that I was low as I could get
I had hit rock bottom ever since you up and left
But this morning when I saw you with
Somebody else, well needless to say
That's when I started sinking even lower
And as far as where I am at today

There's two feet of topsoil
A little bit of bedrock, limestone in between
A fossilized dinosaur
A little patch of crude oil
A thousand feet of granite underneath
Then there's me

I was kinda hopin' I could dig my way back out
A couple dozen roses maybe get you back somehow
But the love in your eyes as you talked to him
Today was plain to see
So I ain't gonna get involved, but
Should you change your mind
Well you know right where I'll be

There's two feet of topsoil
A little bit of bedrock, limestone in between
A fossilized dinosaur
A little patch of crude oil
A thousand feet of granite underneath
Then there's me
