

I was just wandering after love
if I started falling anywhere around here
'cause I swear that I saw in the sky, a comet
A star flying high everywhere
If you know me, know me, know you can show me
Yes I know, if you want, move close to the sun
And ohh
And ohh
I feel that, too young, I know it's all wrong
We walk through the field without a care in the world
If you know me, know me, know you can show me
Yes I know, if you want, move close to the sun
And ohh
And ohh
And all we are is all we are
And all we are is all we are
