You get the car

I'll get the night off

You'll get the chance to take the world apart and figure out ho w it works

Don't let me know what you find out

I need a car

You need a guide

Who needs a map

If I don't die or worse I'm gonna need a nap

At best I'll be asleep when you get back

I wanna see it when you find out what comets, stars, and moons are all about

I wanna see their faces turn to backs of heads and slowly get s maller

I wanna see it now

I want specifics on the general idea

I wanna think what I should know

Want you to do me what to show

I wanna see movies of my dreams

I wanna see it when you get stoned on a cloudy breezy desert af ternoon

I wanna see it untame itself and break it's owner

I wanna see it now

I wanna see it now
