-lactic, mathematical tactics
We never movin backwards, attractive
To the active, mental state, and these black kids
can relate, to the shit we spit on the wax plate

The have-nots in this world is the type that lose they girl

I be the dominant force, similar to gravitation
Follow my course of navigation, we'll earn respect
and admiration of the population pump it on your station

A masked man came with the quick-fast game
with the kick-ass aim, and the plan for holdin big heads
Tryin to jump two spaces and beat two different cases
