

## Titan

## Brave Saint Saturn

Behind what I know and see  
A darkness that will spy on me  
Eclipsed in this trajectory  
A cancer that is eating me

Destroy, divide the dark inside  
Destroy, divide the dark inside

In between the molecules is cold  
No light for shaking fingers to ever have their hold  
And I'm afraid I'll never see the light  
The blind are following in sightless plight

Here its comes

Destroy, divide the dark inside  
Destroy, divide the dark inside

Titans looming over me  
Giants that are crushing me  
Titans looming over me  
Giants that are crushing me

Here it comes

Destroy, divide the dark inside  
Destroy, divide the dark inside  
Destroy, divide
