

Forget It

Breaking Benjamin

1. It's a crime, you let it happen to me, never mind I let it happen to you

I don't mind, forget it, noting to loose

But my mind and all the things I wanted

Every time I get it, throw it away It's a sign I get it I want to stay

By the time I loose it I'm not afraid, I'm alive but I can surely fake it

R1: How can I believe, when this cloud hangs over me,
You're the part of me that I don't want to see

2. There's a place I see you follow me

Just a taste of all that might come to be

I'm alone, but holding breath you can breath

To question every answer counted

R2: Just fade away please let me stay, caught in your way
Just fade away please let me stay, caught in your way

3. It's a crime, you let it happen to me, I don't mind I love it easy to please

Never mind forget it, just memory of a page inside a spiral notebook

*: Just fade away please let me stay, caught in your way
I could live forever here
How can I believe, when this cloud hangs over me
You're the part of me that I don't want to see
