

Please Don't Say

Breathe Carolina

I'm sorry that we fell off
The stars are never on our side
I thought that we would grow up
Together but we lost our minds

All of the years, they disappeared
And now that we're here it's simple
Let's pick up where we left off
And never let the stars decide

Please don't say it's getting late
I want more time to feel this way
Please don't say it's getting late

I can't believe we're back here
Tell me it'll work this time
What if we could let go
And leave all the drama behind

All of the years, they disappeared
And now that we're here it's simple
Let's pick up where we left off
And never let the stars decide

Please don't say it's getting late
I want more time to feel this way
Please don't say it's getting late

If the night could wait around
I'd tell the sun, "Hold off a while"
I'll take my time with you, hold

Please don't say it's getting late
I want more time to feel this way
Please don't say it's getting late
