## Rescue

## **Breathe Carolina**

Spare us the rescue. We're not lost, we just go where we want Spare us the rescue. When we roll we roll deep and we'll sink t wice as low Spare us the rescue. I can walk, I can walk on my own two knees It takes, takes some, takes some dying to feel alive. Spare us the rescue. A friend in need is a friend I don't need Spare us the rescue. We've made peace with our lovely disease Spare us the rescue. Crawled out o fmy tunnel vision to find It all, all went, all went wrong but it feels alright. Didn't we enjoy ourselves when we destroyed ourselves. Whatever happens we're fine We're on our last life, we'll make no compromise whatever happe ns we're fine Spare us the rescue, Back on the street a mile up in the sky Spare us the rescue. I'm close with my demons there's no need t o hide Spare us the rescue. I've worn out my sins, I need new ones to shine It takes, takes some, takes some ding to feel alive Didn't we enjoy ourselves when we destroyed ourselves. Whatever happens we're fine. We're on our last life We'll make no compromise. Whatever happens we're fine, so spare us the rescue Where have we been where will we go so far. I'm not distant but this distance makes all the difference to me. Who have we been? Who will we b e so far? It's not visible but we're perfectly comfortable here.
