

# Shadows

Breathe Carolina

Your body was the one thing I wanted  
You bit your bottom lip, I felt it in my bones  
Heart jumps out my chest, I was haunted  
I had to shake it off, when can we be alone?

How'd you get me up against the wall?  
So I, I never thought that I could take the fall  
And now I want it all

Are you shadows in the dark there too  
Run my fingers through your hair  
'Til every part of me is part of you  
Now I want it all

Your name on the tip of my tongue tastes  
Like smoke and you fuck so incredible  
You slip through the cracks fill the dead space  
I had you every way, but I woke up alone

All of me is wrapped around you  
They will never hold you like I do  
A thousand suns will stay and melt  
Our shadows into one  
Now I want it all
