

# Skeletons

Breathe Carolina

We're face to face  
Sorry to wake you, I just had to  
What's done is done  
Now that I'm sober I just had to tell you

All that I had to hide  
You deserve the truth  
Almost in love, close enough  
It's what I have to do  
You need to hear  
You need to hear this all from me

Skeletons in my room  
I've laid them all out for you  
Second thoughts will be the death of us  
And I don't want the death of us

If I can change...  
If I can change...  
If I can change...  
I know I'm better with you on my side

If I can change (Can I change your mind?)  
If I can change (Can I change your mind?)  
If I can change (Can I change your mind?)  
I know I'm better with you on my side

If I can change (Can I change your mind?)  
If I can change (Can I change your mind?)  
If I can change (Can I change your mind?)  
I know I'm better with you on my side

These words will stay here  
I hope behind and not between us  
With this, we're free now  
I'm where I am and you're the reason

Woah!

You should know that you saved me  
From a place that I never would've left alive  
You got my heart and it's racing  
I'm pacing back and forth

Skeletons in my room  
I laid them all out for you  
Second thoughts will be the death of us  
And I don't want the death of us

If I can change...  
If I can change...  
If I can change...  
I know I'm better with you on my side

If I can change (Can I change your mind?)  
If I can change (Can I change your mind?)  
If I can change (Can I change your mind?)

I know I'm better with you on my side

If I can change (Can I change your mind?)

If I can change (Can I change your mind?)

If I can change (Can I change your mind?)

I know I'm better with you on my side

If I can change

Shake off these skeletons

Lay them

Down bury them

Take all these skeletons

Lay them

Down bury them

Can I change your mind? (We could bury them!)

Can I change your mind? (We could bury them!)

Can I change your mind? (I could bury them!)

I'm better with you on my side

Skeletons in my room
