

Light The Fire

Brennan Heart

For ten years
We have been moving to the energy called hardstyle
But this energy is evolving, growing and expanding in new
directions
With the experience of a decade
We had producers and DJs
Exploring the depth of the audio spectrum
Creating the sparks that someday may light the fire of a
new style
What we need is an audience to recognize when a new
energy has emerged
So we can celebrate the old
Embrace the new
And secure the future of the harder styles (2x)

When the energies of beats and rhythms, emotions and
melodies
Merge and travel in the same direction
We witness the birth of something new
Once this novelty is named and labeled
We call it a style
