

Only Want You

Brett Dennen

Listen to the river
Does it make you wonder
How anything could ever stand still?

First lightning then thunder, thunder
A kiss in the rain, love
Feel the thrill

I only want you
I only want you
I want what we had

I only want you
I only want you
It's as simple as that

Run to the forest
You'll find some shelter

Remember how we fell in love so sweet?

You said watch your step
Walk softer softer
'Cause dreams are growing below our feet

I only want you
I only want you
I want what we had

I only want you
I only want you
Can we get it back?

I only want you
I only want you
I want what we had

I only want you
I only want you
It's as simple as that

Yours is the best love
It's the best love
So pure and so true

Our love will lift us
Our love will lift us
Only love, my darling
Only you

When I do not feel inspired
I can only speak my heart

I'm sitting in the middle of a fire, fire
And I can't even catch a spark

I only want you

I only want you
I want what we had

I only want you
I only want you
Can we get it back?

I only want you
I only want you
I want what we had

I only want you
I only want you
It's as simple as that
