

# Only Want You

Brett Dennen

Listen to the river  
Does it make you wonder  
How anything could ever stand still?

First lightning then thunder, thunder  
A kiss in the rain, love  
Feel the thrill

I only want you  
I only want you  
I want what we had

I only want you  
I only want you  
It's as simple as that

Run to the forest  
You'll find some shelter

Remember how we fell in love so sweet?

You said watch your step  
Walk softer softer  
'Cause dreams are growing below our feet

I only want you  
I only want you  
I want what we had

I only want you  
I only want you  
Can we get it back?

I only want you  
I only want you  
I want what we had

I only want you  
I only want you  
It's as simple as that

Yours is the best love  
It's the best love  
So pure and so true

Our love will lift us  
Our love will lift us  
Only love, my darling  
Only you

When I do not feel inspired  
I can only speak my heart

I'm sitting in the middle of a fire, fire  
And I can't even catch a spark

I only want you

I only want you  
I want what we had

I only want you  
I only want you  
Can we get it back?

I only want you  
I only want you  
I want what we had

I only want you  
I only want you  
It's as simple as that
