

Another World

Brian May

In another world
Under another sky
I see another story waiting to be told
And another you
Wakes up with another me
For that's the way we've come to be
In another world

In a different place
Way across time and space
A door is open wide
Drawn to a different light
Maybe we'll step inside

In another world
We can show we care
You can be sure I'm waiting there
In another world

Oooh yeah
When the dice were cast
They laid a crazy path
We follow to our graves
But I know in a different world
We journey a different way

So we live
But life isn't what it seems
We're only living in our dreams
In another world

You can believe I'll meet you here
In another world
