

## Another World

Brian May

In another world  
Under another sky  
I see another story waiting to be told  
And another you  
Wakes up with another me  
For that's the way we've come to be  
In another world

In a different place  
Way across time and space  
A door is open wide  
Drawn to a different light  
Maybe we'll step inside

In another world  
We can show we care  
You can be sure I'm waiting there  
In another world

Oooh yeah  
When the dice were cast  
They laid a crazy path  
We follow to our graves  
But I know in a different world  
We journey a different way

So we live  
But life isn't what it seems  
We're only living in our dreams  
In another world

You can believe I'll meet you here  
In another world
