

# The Like In I Love You

Brian Wilson

You reached into my heart  
And found the music of my soul  
The melodies unfold  
For you

I've never danced before  
Until you asked me  
Then magic lights lit up the floor

Gliding in a starlit less sky  
Until we found the inner light  
Now we can duplicate the universe

The pain in painting  
The muse in music  
The like in I love you

When you connect the dots  
I see your picture coming through  
The story's always you

It's more than harmony  
When you sing with me  
It's an entire symphony

Don't be afraid, love  
We can take it from  
The happy ending

The great in grateful  
The faith in faithful  
The like in I love you
