

Staying Together

BriBry

I want to be in love with you forever

Forget about the childish doubts, my silence when we talk about
you going somewhere without me

Every Sunday evening time, you pack your bags and we leave mine

,

I purposely leave late and hope your bus comes early

There's so many things that'll stop us from staying together

But I want to be in love with you forever

If I drew up a contract would you sign and agree to share your
life with mine

Or would the romance die in that split second

I want to stay in this paradise, quoting you lyrics every night

Not telling you which ones that I wrote myself

about the oh so many things that'll stop us from staying together

But I want to be in love with you forever
