

Don't Use Me

Bride

Lazy alley mind filled my crazy head with crack
Spooky little spinner, so we called up the jack
I felt my feet dangling from the 27th floor
I ain't no train-stopping Superman no more
Black out night in Philly, things were getting kinda silly
And the tattoo move right up my arm
And we knew we were losing, fuzzy-eye city snoozing
Needle didn't leave a scar

Don't use me, don't bleed me
You see me on my knees
Don't use me, don't bleed me
You know just what I need

And the door opened wider, Ryan pitched me a slider
And the lights went out for seven weeks
There's a certain kind aroma when your body crashing coma
And you're too tongue-tied to speak
Real easy hustle, got a brain storm muscle
'Cause I'm buzzing like a bumble bee
Rocky cut me to the floor, I got kicked by the horse
Something like I've never seen

Don't use me, don't bleed me
You see me on my knees
Don't use me, don't bleed me
You know just what I need

I got a friend with a monkey, don't you think it's kind of funky?
He's a real Judas kiss
I found him face down in bed drive-by shooter dead
Times like this, I won't miss
When he came to from his haunting blue
I said a miracle has happened to me
Found myself a-staring in the eyes of someone caring
He said "Boy, gonna set you free"

I could never imagine salvation and compassion
Or a life without guilt and pain
Jesus cried drops of blood in the garden with His love
So we would believe on His name

Don't use me, don't bleed me
You see me on my knees
Don't use me, don't bleed me
You know just what I need

Don't use me, don't bleed me
You see me on my knees
Don't use me, don't bleed me
You know just what I need (what I need)

Don't use me, don't bleed me (in my side, in my side, in my side)
(got another thorn in my side)

Don't use me, don't bleed me (in my side, in my side, in my side)
(What I need)

(What I need)

Don't use me, don't bleed me
(It's the difference between living and half of dead
No matter what you seen, what you heard and what you read)

Don't use me, don't bleed me
(It's time to shoot the moon
Leap year, afternoon
But the morning came too soon)
(what I need)

Let me tell ya, someone is standing in the light
