We Are Together

Many years ago I saw a great light Everything that was wrong suddenly became right I learned the mysteries of the whole universe But I can't share them now cause things will get worse I might say and do unexplainable things I might be real or I could be a dream But mark my word they will come true Don't hold back just do what I do We are together you and I So don't fight me or excite me Or wish to die I have seen the world from a million miles away Through the eyes of God so don't be dismayed Euphoric glimpse's of eternal bliss Don't turn your head this is something you don't want to miss I know what's in the heart of every person that I see Their fears and desires were put there by me One day you'll see me and I'll be gone Count this as an invitation to come along
