

# Until The World Ends

Bridge to Grace

If everything were failing  
We understand  
That every day we're living  
And I know when the day comes  
We'll fight it all away  
I just hope that there's still courage to say

Haven't I told you this  
We are just living for something else  
Haven't I told you this  
We were so lost and  
Lonely waiting for the end  
While I'm slowly falling for our friend  
Until the world ends

The days are all behind us  
Everything is real  
And the world is all so right down

And I know when the time comes  
We will make it 'till the end  
I just hope there's still words left to say

Haven't I told you this  
We are just living for something else  
Haven't I told you this  
We were so lost and  
Lonely waiting for the end  
While I'm slowly falling for our friend  
Until the world ends

Just when all is turned to grey  
Until the world ends  
Just when all is gone  
The shadow fades away  
The shadow fades away

Haven't I told you this...

Haven't I told you this  
We are just living for something else  
Haven't I told you this  
We were so lost and  
Lonely waiting for the end  
While I'm slowly falling for our friend  
Until the world ends  
Until the world ends

Until the world ends  
Until the world ends
