

## Weapon

### Bridge to Grace

I will medicate, I can be the one  
Never sleep again, 'till we see the sun  
Stare at yourself for hours in the mirror

You'll materialize it's been said before  
That make-up won't hide all of time's scars  
So let's get to all the things that were said

Let's make this nightmare last forever  
Stare deep inside the eye of a fever  
You call my name  
We always search for something more  
You come to me  
You use your weapon and blow my brains

It's your deepest fear, you're shaking again  
Lock up all the doors, make me feel the sin  
Board the windows, make sure no one is near

Open up your mind, bandage up your wrists  
Don't put up a fight, you have a sickness  
Say my name three times, I'll be right here

Let's make this nightmare last forever  
Stare deep inside the eye of a fever  
You call my name  
We always search for something more  
You come to me  
You use your weapon and blow my brains

Let's make this nightmare last forever  
Stare deep inside the eye of a fever  
You call my name  
We always search for something more  
You come to me  
You use your weapon and blow my brains
