

Easy To Fall In Love

Brighten

You look like the afternoon
When you wake at six in the morning
Ready right then and we're kids again

You look like a sunny day
When I look outside and it's storming
When you look at me and blink so slowly

Everything you do makes it easy to fall in love with you
Now, now don't give me the run around
With everything you do I just can't seem to get over you
Honey, now, now don't give me the run around

I love when she writes for me
And she doesn't even play the piano
She plays it so good
Better than I could

Our love gets better every day
With every touch and sound that your voice makes
How did we get here?
It's better than last year

So tell me now, tell me how
I got so lucky, my dear

Everything you do makes it easy to fall in love with you
Now, now don't give me the run around
With everything you do I just can't seem to get over you
Honey, now, now don't give me the run around (Don't give me the run a round)

Don't think twice
Don't ask why we've gotta do these crazy things sometimes
We'll be fine
Just realize that everything's alright
We are out of our minds

Everything you do makes it easy to fall in love with you
Now, now don't give me the run around (Don't give me the run around)
With everything you do I just can't seem to get over you
Honey, now, now don't give me the run around (Don't give me the run a round)

Don't give me the run around
With everything you do
Don't give me the run around
With everything you do, girl
