

# Let Love Be

Brighten

Take a chance on a wounded heart  
Pick a time, pick a place to start  
There's no better time than now

You say you're waiting for someone to save you  
What's the worst that can happen baby  
Just let love work it out

Who am I?  
Who are you?  
What are we supposed to do?

There is more to love than what we're making  
Who are we to complicate it?  
What do you want with me?  
What do I think I need  
True love's not fabricated  
Who are we to try to make it  
If it's gonna be you and me  
We can just let love be

So easy, yet so hard  
To approach baby, yes you are  
And I will give it one more try

We could be together, love  
Longer than forever  
We can give it one more time

Who am I?  
Who are you?  
What are we supposed to do?

There is more to love than what we're making  
Who are we to complicate it?  
What do you want with me?  
What do I think I need  
True love's not fabricated  
Who are we to try to make it  
If it's gonna be you and me  
We could just let love be  
We could just let love be

And I'll try to be the one  
The one I've never been  
With patience and an open heart  
And I will never run down the road again  
I'm tired of being torn apart

There is more to love than what we're making  
Who are we to complicate it?  
What do you want with me?  
What do I think I need  
True love's not fabricated  
Who are we to try to make it  
If it's gonna be you and me  
Oh, if it's gonna be you and me

We could just let love be  
We could just let love be
