

There For Me

Brighten

She's so mad, she keeps spinning around
But to me she's like a vulture scanning the ground
She's so good, such a fine sight to see
But be careful boys, she's also been looking at me

She wasn't there for me
She wasn't there for me

If you started looking around, you could learn a lot my dear
If you start coming down, you could love without your fear
You try to talk to love, but you never talk sincere
She wasn't there for, there for me
She wasn't there for me, then she never will be

Time goes by and I still can't kick her away
There's a ghost in the house but I'll never see it turn to day
I'll try to remember what she did to me, does to me
Or will do to me if I keep on living this way

She wasn't there for me
She wasn't there for me

If you started looking around, you could learn a lot my dear
If you start coming down, you could love without your fear
You try to talk to love, but you never talk sincere
She wasn't there for, there for me
She wasn't there for me, then she never will be

She could be fun, she could be the one
But it's not gonna work this time
Deep down I know, I can leave her alone
Driving her out of my mind

If you tried looking around, you could learn a lot my dear
If you start coming down, you could love without your fear
You try to talk to love, but you never talk sincere
She wasn't there for, there for me
She wasn't there for me, then she never will be
