

Airport Tags

British India

Remember us?

We're the ones who made the party suck
Changed the music playing way too much
And then turned it off

And she was like there's no point to my entire life
Well that sounds so bad but feels alright
Maybe that's the point, don't relax we're not finished yet

Tonight everything's going to change
She's broken in every way
Wasted nights turn into wasted days
But tonight everything's going to change

Airport tags, she was gone now she's coming back
I was worried but it's not that bad
Nothing much has changed

So hang yourself in the bedroom at you parent's house
Watch as all your best friends gather round
And you might feel loved, don't relax we're not finished yet

Tonight everything's going to change
She's broken in every way
Wasted nights turn into wasted days
But tonight everything's going to change

Don't relax we're not finished yet
Tonight everything's going to change
She's broken in every way
Wasted nights turn into wasted days
But tonight everything's going to change

Tonight everything's going to change
Tonight everything's going to change
