

# The Sun Is Rising

**Britt Nicole**

When life has cut too deep and left you hurting  
The future you had hoped for is now burning  
And the dreams you held so tight lost their meaning  
And you don't if you'll ever find the healing

You're gonna make it  
You're gonna make it  
And the night can only last for so long

Whatever you're facing  
If your heart is breaking  
There's a promise for the ones who just hold on  
Lift up your eyes and see  
The sun is rising

The sun is rising

Every high and every low you're gonna go through  
You don't have to be afraid I am with you  
In the moments you're so weak you feel like stopping  
Let the hope you have light the road you're walking

You're gonna make it  
You're gonna make it  
The night can only last for so long

Whatever you're facing  
If your heart is breaking  
There's a promise for the ones who just hold on  
Lift up your eyes and see  
The sun is rising

Even when you can't imagine how  
How you're ever gonna find your way out  
Even when you're drowning in your doubt  
Just look beyond the clouds

Just look beyond the clouds

Whatever you're facing  
If your heart is breaking  
There's a promise for the ones who just hold on  
Lift up your eyes and see  
The sun is rising

The sun is rising

Even when you can't imagine how  
How you're ever gonna find your way out  
Even when you're drowning in your doubt  
Just look beyond the clouds
