

# She Was Born to Run

Brooks & Dunn

She said goodbye to her daddy while her mamma cried  
I kept the motor runnin' in my car outside  
She kissed him on the cheek, daddy's little girl  
Then a woman walked out to take on the world

Through red taillights and a cloud of dust  
We went flyin' through the night, it was all about us  
Sittin' on the seat right next to me, we drove with a tank full  
of destiny

She was born to run  
She was born to run  
She was born to run born to run to me

With a new world waitin' down the road up ahead  
Passion runnin' wild through our hearts and heads  
With everything we owned packed in the backseat  
We had each other, that was all we needed

They all called me crazy, said she'd never settle down  
I was just her ticket, her ticket out of town  
But it looks like that night fate proved 'em wrong  
'Cause she's been mine, mine all along

She was born to run  
She was born to run  
She was born to run born to run to me

It's been years now and I never doubted  
Somewhere, somehow we'd make through  
She's still here, no two ways about it  
Her heart's still mine and her love's still true

She was born to run  
Was the Master's plan  
Born to run  
Put her heart in my hand  
Born to run born to run to me
