

I Can't Wait

Brother Ali

B-b-b-b-baby, I-I-I-I can't wait, your love
B-b-b-b-baby, I-I-I-I can't wait

Wait, wait, I done tumbled into love again
Ladies first, safety last, nothing under him
Watch it crumble then, build it up again
Long kiss, good fright, you let it tuck you in
Nothing other than, human suffering
Let your frozen bones shutter in the summer wind
Crash test dummy friend turned up to ten
Loves riding shotgun, never buckled in
Make your blood rush so percussively
That you don't adjust to see the drum's new custody
Running full tilt faceless
Eyes wide you collide through that plate glass
Straight smash, open wide, gaping gash
Make this the last time that you late for class
Step in, effect like Armageddon
I thought by now you'd learned your lesson

B-b-b-b-baby, I-I-I-I can't wait, your love
B-b-b-b-baby, I-I-I-I can't wait, your love
Baby
Your love
