

# Never Learn

Brother Ali

I don't know where to turn  
I hit my head I guess I'll never learn  
But they tell me I should let it bleed, let it sting, let it burn  
Get my head firm

I don't know where to turn  
I hit my head I guess I'll never learn  
But they tell me I should let it bleed, let it sting, let it burn  
Get my head firm

My goodness good morning  
You're still an apprentice  
Every generation of MC fuck with me so I'll by consensus  
You see what I speak you touch it and feel it all six of your senses  
My mission is endless I've been in this ten and I'm still as relentless  
Now build you a fence if you're feeling defensive

My power comes from the Most High  
Lord God of the globe sky  
Soul vibration is so fly I can walk on water no lie  
Champion author small fry rock of Gibraltar; north side  
Serving this culture might I confide that I'm here to assault you

I got some money in the bank that I did not have when I start  
Got a little money up in my hand I do not have money in my heart  
I'm standing on champion greatness  
I can not claim it cause that's the creator I stand up and state it  
That's not bragging it's praying that's what I'm saying

I don't know where to turn  
I hit my head I guess I'll never learn  
But they tell me I should let it bleed, let it sting, let it burn  
Get my head firm

I don't know where to turn  
I hit my head I guess I'll never learn  
But they tell me I should let it bleed, let it sting, let it burn  
Get my head firm

Ya Hafidh; Ya Wadud  
I was standing on stage when my hero died  
Feel the heartbeat of my people's cries  
Nation nineteen thirty three bowties  
Light of the deen gleaming in your eyes  
Even when the tears flow down both side you know why you sacrificed your whole life  
You can go ahead, let your soul fly cause the whole tribe blood line flow through mine

Listen, we love to fight cause we fight for love  
The poor righteous sons where the diamonds from  
Libraries are transcribing us  
And our ancestors are more alive than us  
Put down everything you're trying to clutch  
An undying lust to see the climate just  
Baby we ride 'til our time is up  
That's just The Divine in us

I don't know where to turn  
I hit my head I guess I'll never learn  
But they tell me I should let it bleed, let it sting, let it burn  
Get my head firm
