

## Far Away From Love

Brother Firetribe

Oh my God it's been forever  
since I heard your voice  
It's hard to keep my thoughts together  
You're leaving me no choice

I thought we already talked about  
something that we both could agree on  
But here we go for another round  
You'll end up with nothing won

Don't wanna hurt you  
Telling you one last time  
I don't wanna do this over and over and over again

An endless summer night, holding you so tight  
but I guess I never learned to know you at all  
In the heat of the night we were one and the same  
but we were far away from love  
Blinded by the flame when passion ruled the game  
Guess I should've learned to know you well  
Though we were bonded by lust for one night  
We were far away from love

I don't mean to put you down but take this to your heart  
Listen to me, listen closely now, this might tear you apart  
I never thought it was serious  
Blame it on me just having fun  
You fell in love so Whole heartedly  
Didn't see all was said and done
